## DETAILED ACTION

### *Election/Restrictions*

Newly submitted claims 53-60 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The new claims include limitation for altering data corresponding to the content wherein the altering processes the content data using a pseudo random permutation which yields data having a substantially flat power spectral density.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 53-60 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

*53-57 are*

*fu* Claims *✓* rejected under 35 U.S.C. 112, second paragraph, as being indefinite for

failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim<sup>53</sup> recites "data having a substantially flat spectral density." Substantially flat is unmeasured and *undefined*. *fu*

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claims 1, 15, 27, 37, 53, 58** are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

*In reference to claims 1, 27*, consists solely of executing a mathematical algorithm which is non-statutory subject matter.

*In reference to claims 15, 53, and 58*, claims transforming data and as such manipulates abstract ideas or concepts. The claims lack a useful concrete and tangible result.

*and 112, 2nd paragraph*  
*Ku* In the case that the claims are amended to overcome the 101 rejection, the above claims will be allowable.
